## Neutral generator

**Power:** 3000 ÷ 50000 VA

**Mains voltage:** 400 ÷ 600 VAC

**Connection:** Zig-Zag

CE c  us

### Technical data

Duty cycle: continuous

Frequency: 50/60 Hz

Protection rating: IP0

Terminal board protection rating: IP20

Ambient temperature: F/155°C or B/130°C

Protection against direct and indirect contact: class I

Winding material: copper

Standards: EN61558-2-13

Approvals: cURus (insulation systems AB155 UL CSA file number E340840)

Neutral generator for use in three-phase networks in which a neutral conductor is not available. Composed of a single winding, this unit does not feature galvanic separation from the power supply circuit. GEN series units are manufactured on demand.
