## Single-phase and three-phase inductors

CE cRU<sup>®</sup>US

### Technical data

Duty cycle: continuous

Saturation current:  $I_n \times 1,5 \div 2$

Frequency: 50/60 Hz

Protection rating: IP00

Terminal board protection rating: IP00 - IP20

Ambient temperature: F/155°C

Protection against direct and indirect contacts: class I

Winding material: copper

Standards: EN61558-2-20 EN60289

Approvals: cURus (insulation systems AB155 UL CSA file number E340840)

Inductor to be installed at the inverter input and output to limit peak current and the propagation of noise in the form of voltage harmonics.  
IND series units are manufactured on demand.
